

40 BRIDGES VATHORST

1996-2010, Amersfoort, The Netherlands

West 8 together with Kuiper Compagnons made a masterplan for the Vinex site Vathorst in Amersfoort. The public space is dominated by the presence of water. Therefore there are over 40 bridges connecting the different parts of the new site. These parts have their own identity which is also expressed in the varying architecture of the bridges.
